

Change now seems constant in the agriculture markets. Severe weather, geopolitical tensions, domestic policies, surging biofuel demand, concerns for food insecurity, and changing trade flows continue to affect the day-to-day reality of the market. Volatility is now the constant.

It is no longer possible to stay on top of the market through global futures contracts or benchmarks; the market is now driven by decentralized trade and price data and requires an objective, global, immersed entity to deliver decision-quality market and price signals.

Fastmarkets Agriculture provides the market-reflective price data, news, and market intelligence you need to stay ahead in a rapidly changing market. Formed from AgriCensus, EnergyCensus, and The Jacobsen, Fastmarkets Agriculture gives our customers the edge in volatile markets.

### Why choose Fastmarkets?

- Independent price data in regional markets across the globe
- Daily price assessments usable as references for negotiations, physical spot and term contracts, and the settlement of financial derivatives
- Daily prices usable for the valuation of physical inventories, mark-to-market valuations of financial instruments, and the creation of associated derived data
- Daily price assessments of the physical forward market reflecting values for loading or delivery up to 9 months ahead
- Curated key news in a daily newsletter to bring the world to you
- Access the experts immersed in the different regional markets
- Able to directly feed data into Excel or receive data via an API Data Feed
