INTRODUCTION – THE SEARCH TOOL

You might also be interested in reading the user guides to other related topics including; Comparing Prices, News, Charts, Alerts, Historic Prices and Customizing your Workspace.

The search tool, which can be found at the top of the Dashboard or within widgets, can be used to find prices and news articles by using keywords or

Fastmarkets My Charts Last edited 15 minutes ago
--

filters. Prices and news are tagged to pre-defined categories, ensuring relevant content can be found easily. The Search tool will also scan descriptions as well.

Search for prices

The search tool will filter out irrelevant information by using modifiers to quickly discover new or specific content. Any prices that are not included in your subscription will not appear in the search results.

The following example shows how the search tool returns the result for the "aluminium P1020A premium, duty unpaid in-warehouse Rotterdam, \$/tonne" without the need to fully type or know the description.

As "aluminium p" is typed the Product filter suggests results.

Narrow the results further by beginning to type "Rotterdam" and selecting it from the Location filter.

Selected filters appear above the results. The results will narrow or broaden further with each one applied or removed. Choose "aluminium P1020A premium, duty unpaid in-warehouse Rotterdam, \$/tonne" from the returned results, then select the widget and workspace to which you want to add it.

Choose from Single Price Tile, Price Chart, Multi Price Table or Historical Price Table and select the workspace from the dropdown menu.

If no results are available, you will see the error message below. Alternative search terms should be used.

Clicking on a price result will open the price Overview dialogue box.
