## INTRODUCTION

Fastmarkets publishes weekly, monthly, quarterly and yearly averages based on the underlying actual assessments. For certain Cobalt prices there are also Weighted Average of Trades (MB-CO-0004 and MB-CO-0005). The averages are published on the first day of the next average period for the previous average, e.g., for a monthly average published on 1st June it will display the May monthly average.

## FASTMARKETS AVERAGES METHODOLOGY

Fastmarkets averages are a simple average calculation. Fastmarkets' simple monthly averages are calculated by dividing the sum of all price quotations within a month by the number of quotations published during the calendar month. For assessments, Fastmarkets derives both the monthly average high price and the monthly average low price using this method. For indices, a single monthly average price point is calculated.

The following assessments are published on a simple average methodology:

- All base metals, including calculated prices
- All nonferrous scrap, including calculated prices
- All steel
- Ferrous scrap, including regional domestic assessments - such as Chicago, Detroit, etc. - and export yard prices, the export indices, Mexican scrap prices and the Midwest scrap indices

Fastmarkets averages for calculated composite prices for ferrous scrap are the exception to the above. These are calculated using a rolling average methodology by dividing the sum of the daily price quotations - including prices republished on non-assessment days - by the number of quotations published during the calendar month.

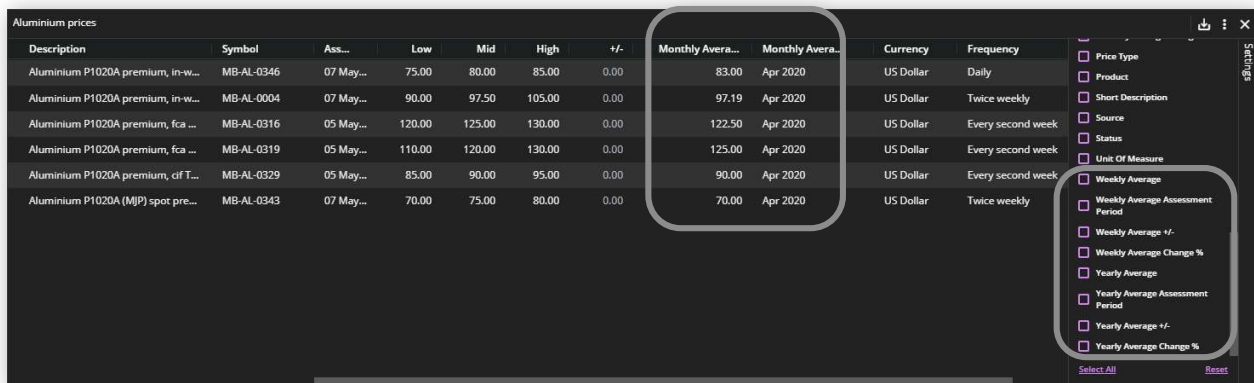

In a rolling-average scenario, prices are published daily, regardless of how frequently they are updated. Daily price quotations are rolled over on working days until the following price change, excluding holidays and weekends. No pricing inputs are published on holidays or weekends.

## DISPLAYING AVERAGE PRICES IN WIDGETS

You can view published average prices in the Single Price tile, Price Chart, Multi Price Table and Historic Price table widgets.

### Displaying average prices in a Multi Price Table widget

Monthly average prices are displayed by default in the Multi Price Table. To edit or add further average prices click the Settings tab and scroll down for weekly, quarterly and yearly average fields.

### Displaying average prices in a Price Chart widget

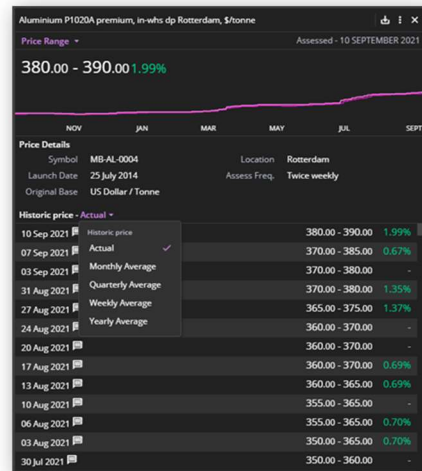

Once a chart has been added, click the dropdown arrow next to the symbol legend to choose between Weekly average, Monthly average, Quarterly average or Yearly average.

Each price added to the chart can display either an actual or average price independently.

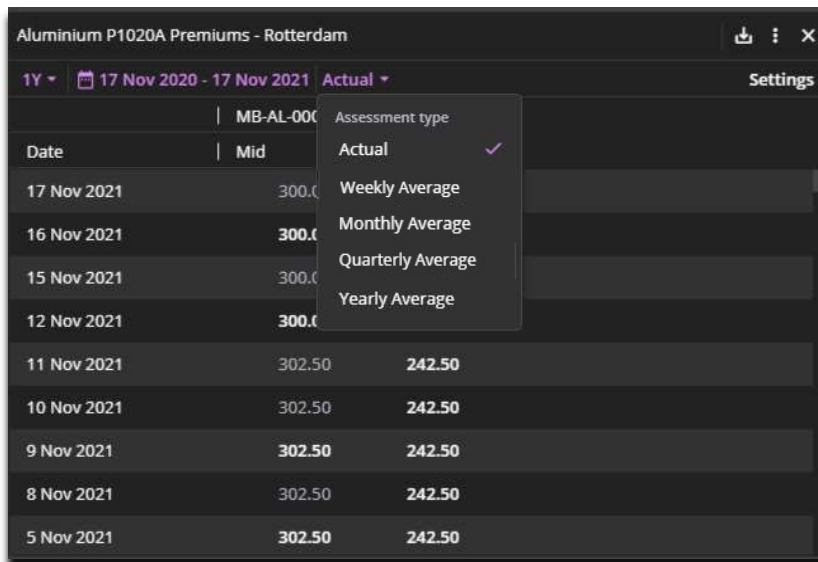

### Displaying average prices in a Single Price Tile widget

To view the published average price in a Single Price Tile widget, click the purple dropdown next to “Historic price” and choose Weekly average, Monthly average, Quarterly Average or Yearly average.

### Displaying average prices in an Historic Price Table widget

Date	Mid	Assessment type

8 Nov 2021	302.50	242.50
5 Nov 2021	302.50	242.50

Once a chart has been added, click the dropdown arrow next to the symbol legend to choose between Weekly average, Monthly average, Quarterly average or Yearly average.

## IMPORTANT NOTES ON MONTHLY AVERAGES

In general, every symbol should have a monthly average. But in some instances, there is a reason why averages may not be available. Please refer to the following sections to check if this is the case.

### Why am I not able to retrieve monthly average prices for US weekly scrap composites?

The following weekly scrap composite prices are an average of the daily composite prices

calculated for the week from Friday to Thursday. Published monthly averages are not available for these prices. The corresponding daily composite prices, shown in the table below, should be used to retrieve monthly average prices. The averages price calculation methodology for Fastmarkets US prices changed as of January 2021. You can find out more here:

### There are other symbols for which I cannot retrieve average prices. Is there an error?

Other symbols for which average prices are not available are those where a converted price (currency and/or unit of measure) is available as well as the published “parent” symbol in the base currency or unit of measure. In this instance, to access or display the monthly average for the converted price, please refer to the “parent” symbol listed below. First convert the currency and/or unit of measure of the “parent” symbol, then access the average price field:
